DETAILED ACTION

Request for Continued Examination

The request filed on 12-16-02 for a Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 09/495448 is acceptable and a RCE has been established. An action on the RCE follows.

Claims 1-4, 6-24 are pending.

Claims 1-3, and 9-23 have been withdrawn from further consideration by the examiner under 37 CFR 1.142(b) as being drawn to non-elected inventions.

Claims 4, 6-8, and 24 are currently under consideration.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

Specification

The specification is objected to on page 22 under the Brief Description of the drawings for failure to incorporate the proper disclosure of amino acid sequences without a respective sequence identifier, i.e. a SEQ ID Nos. Applicant should identify each polypeptide sequence as disclosed in Figure 1 with the respective SEQ ID Nos. **Also, it appears that applicants have not filed the sequence listing for the CEF10 and Nov polypeptides, as a review of the sequence listing did not reveal said polypeptides.**

Art Unit: 1642

Hence, the disclosure fails to comply with the requirements of 37 CFR 1.821 through 1.825. In the absence of a sequence identifier for each sequence, Applicant must provide a computer readable form (CRF) copy of the sequence listing, an initial or substitute paper copy of the sequence listing, as well as any amendment directing its entry into the specification, and a statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 CFR 1.821(e-f) or 1.825(b) or 1.825(d). (see attached notice to comply at the end of this action).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 6-8, and 24 are rejected as vague and indefinite for reciting the term Cyr61 in association with binding characteristics as the sole means of identifying the claimed molecule. The use of laboratory designations only to identify a particular molecule renders the claims indefinite because different laboratories may use the same laboratory designations to define completely distinct molecules. The rejection can be obviated by amending the claims to specifically and uniquely identify Cyr61, for example, by SEQ ID NO.

Claims 4, 6-8, and 24 are further rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: a correlation step describing how the results of the assay relate back to the preamble of the method objectives. For example, the preamble is

drawn to screening for a modulator of cell migration; however, there is no linking step to assaying said modulator. Does the modulation result in up-regulation of migration? Down-regulation of migration? In other words, how is the level of cell-migration altered? The metes and bounds of the claims cannot be determined, and the specification does not specifically define what is meant by altering the migration.

All other rejections and or objections are withdrawn in view of applicant's amendments and arguments there to. No claim is allowed.

- ☐ 2. This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence Listing" as required by 37 C.F.R. 1.821(c).
- ☐ 3. A copy of the "Sequence Listing" in computer readable form has not been submitted as required by 37 C.F.R. 1.821(e).
- ☐ 4. A copy of the "Sequence Listing" in computer readable form has been submitted. However, the content of the computer readable form does not comply with the requirements of 37 C.F.R. 1.822 and/or 1.823, as indicated on the attached copy of the marked -up "Raw Sequence Listing."
- ☐ 5. The computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. A Substitute computer readable form must be submitted as required by 37 C.F.R. 1.825(d).
- ☐ 6. The paper copy of the "Sequence Listing" is not the same as the computer readable form of the "Sequence Listing" as required by 37 C.F.R. 1.821(e).
- ☐ 7. Other:

Applicant Must Provide:

- ☒ An initial or substitute computer readable form (CRF) copy of the "Sequence Listing".
- ☒ An initial or substitute paper copy of the "Sequence Listing", as well as an amendment directing its entry into the specification.
- ☒ A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 1.825(d).
